ABHISHEK MARIGERI

Abhishek M | Abhishek M | abhishekmarigeri9676@gmail.com | +91-9148086527

PROFESSIONAL SUMMARY

Data Scientist with strong foundations in Machine Learning, Deep Learning, and Reinforcement Learning. Proficient in Python, Scikit-learn, and PyTorch, with experience building CNN and DQN models. Skilled in data analysis and visualization using Pandas, NumPy, SQL, and Power BI.

SKILLS

Programming: Python

Machine Learning: Linear/Logistic Regression, Decision Trees, Random Forest, XGBoost, Scikit-learn, Clustering (K-Means), Dimensionality Reduction

Deep Learning: FNN, CNNs, RNNs, Transformers (Basics), PyTorch

Reinforcement Learning: Q-Learning, SARSA, Deep Q-Networks (DQN)

Databases: MySQL, PostgreSQL

Data Analysis & Visualization: Pandas, NumPy, SQL, Matplotlib, Seaborn, EDA, Power BI

Tools: Git, Jupyter Notebook, VS Code

EDUCATION

MVJ COLLEGE OF ENGINEERING *Dec 2022 – May 2026*

Bachelor of Engineering

- **GPA: 8.40 / 10**

EXPERIENCE

Data Analytics Intern — Dyashin Technosoft *FEB 2026 – Present*

- Performed **data analysis using Python**, including **EDA**, **data cleaning**, **feature engineering**, and **encoding techniques** (**label & one-hot**), ensuring **high-quality, model-ready datasets**.
- Created **insightful visualizations and dashboards** using **Matplotlib, Seaborn, and Power BI**, translating **complex data** into **actionable business insights**.

PROJECTS

CartIQ-Intelligent Retail Analytics System [Unsupervised Learning] link

- Developed an **AI-driven retail analytics system** using **K-Means** on **10K+ records**, optimizing clusters via **Elbow Method** and **Silhouette Score**, improving **segmentation by ~25%**.
- Built a **preprocessing & feature engineering pipeline** and applied **PCA** with **EDA**, enhancing **data quality by ~35%** and driving **15–20% better insights**.

DeepVision Classifier [DeepLearning+ComputerVision] link

- Developed a **CNN-based image classifier** achieving **~92% accuracy** on **10K+ images** using **TorchVision** and **normalization**.
- Reduced **validation loss by ~35%** via **hyperparameter tuning** and optimized architecture with **ReLU activation**.

Flappy Bird AI [Reinforcement Learning] link

- Developed a **Deep Q-Network (DQN)** agent in PyTorch using **CNN-based Q-value approximation** to play Flappy Bird , trained over **50K+ episodes**
- Applied **epsilon-greedy exploration with decay**, **experience replay**, and **target networks**, with **hyperparameter tuning** (learning rate, discount factor, epsilon), improving training stability by **~30–40%**.

Hybrid Sentiment Analysis [DeepLearning + NLP] link

- Built an **end-to-end sentiment analysis pipeline** using **TF-IDF + PyTorch RNN** on **10K+ IMDB reviews** with **NLTK preprocessing** (tokenization, stopword removal, stemming).
- Implemented **feature extraction and RNN-based sequence modeling** with **padding/truncation**, capturing **text patterns** to improve performance.
